-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Claims 9-15 and 19-24 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/26/04. In addition to those claims noted by applicant as not readable on the elected species of Figure 11, claims 9-12 and 19-21 do not read on the elected species. Regarding claims 9 and 20, the elected species does not include the plunger moving perpendicularly to the prong. Regarding claim 19, the elected species does not include an inner blade pivotally connected to an outer blade as claimed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in —

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a);

Claims 16 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Marsh et al. ("Marsh"). Per claim 16, Marsh discloses a method for securing a plug to a socket comprising the steps of: inserting an engagement end of at least one prong 4 of

the plug into a receptacle of the socket; actuating a rotatable collar 2 around the plug causing a plunger (6,61) within the plug to move along the prong, thereby applying force to the prong causing the plug to clamp within the socket.

Per claim 17, actuating the rotatable collar causes the at least one prong to selectively move (spreading apart blade 4).

Allowable Subject Matter

Claims 1-8 are allowable. Regarding claim 1, the prior art does not suggest the plug as claimed, including the combination of all the claimed elements, the combination including the housing, the prong, the rotatable collar around the housing, and the plunger within the housing that engages the collar and moves along the length of the prong as claimed. Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Regarding claim 18, the prior art does not suggest the method as claimed, including the combination of all the claimed steps, the combination including the housing and the collar positioned around the housing as claimed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ross Gushi whose telephone number is (571) 272-2005. If attempts to reach the examiner by phone are unsuccessful, the examiner's supervisor, Paula A. Bradley, can be reached at 571-272-2800 extension 33. The phone number for the Group's facsimile is (703) 872-9306.
